Approach to the craft process
Sita Brown Experimental Laboratory

*“I understand the act of culinary creation as a meditation that transforms
the kitchen into a laboratory where I experiment with
measurements, temperatures and times.”*

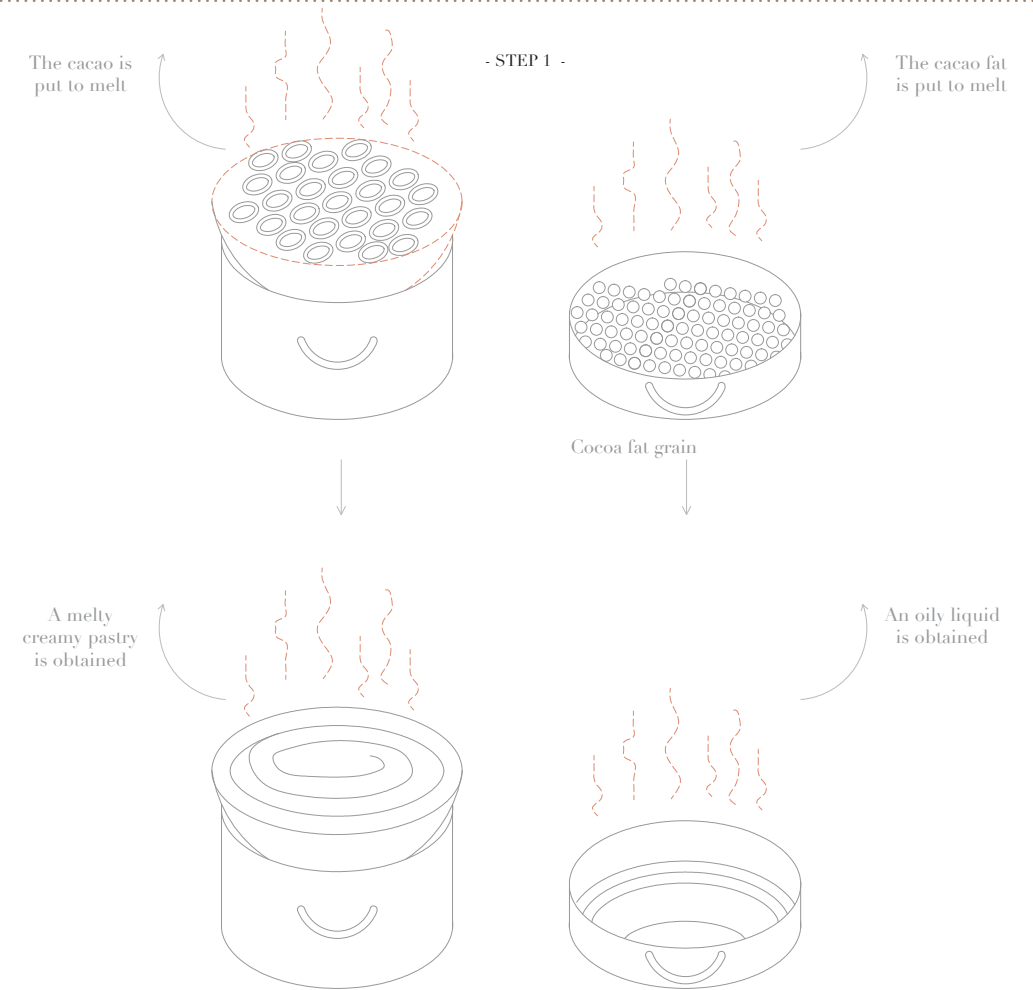

- Sita Brown

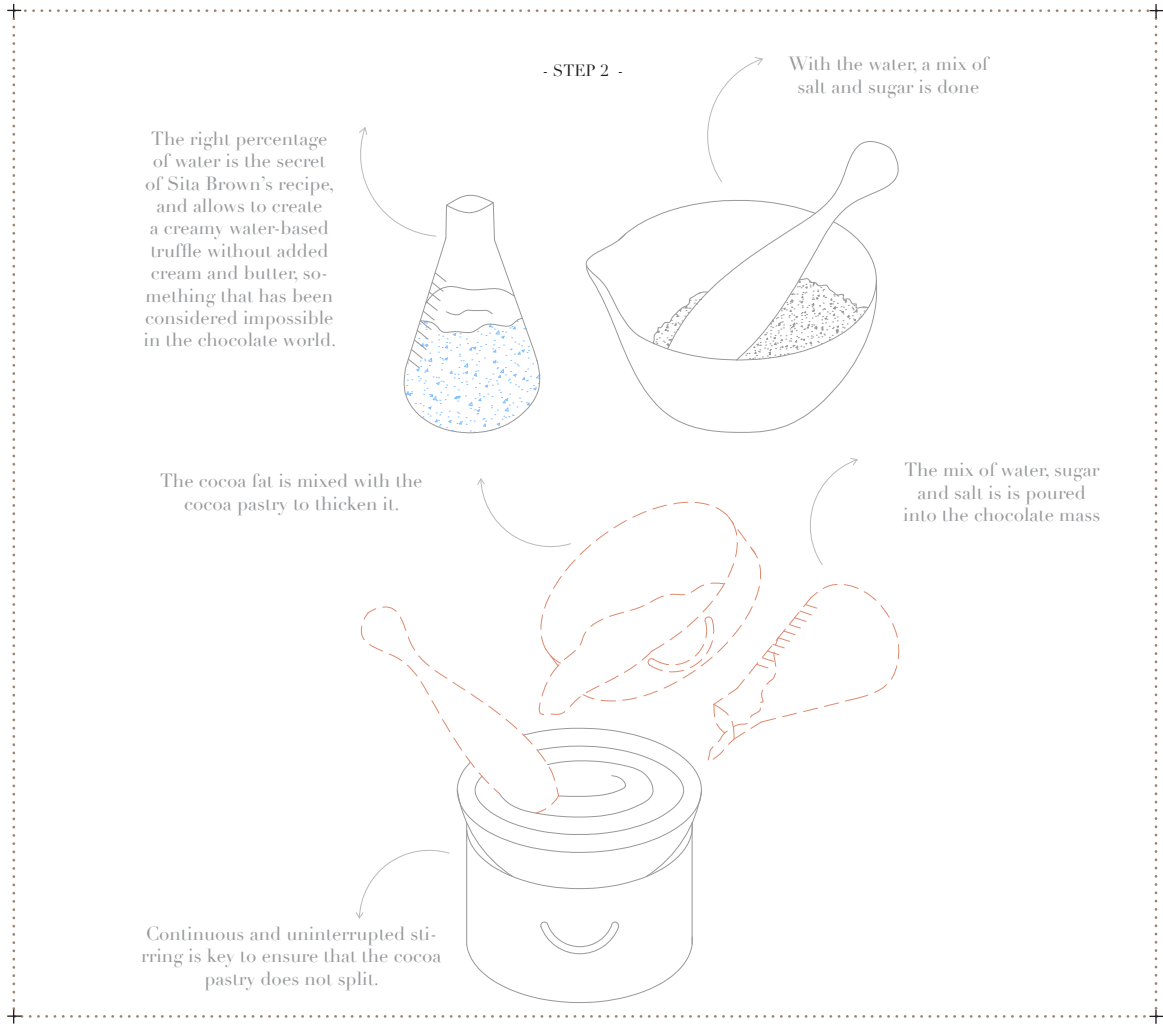

- INGREDIENTS -

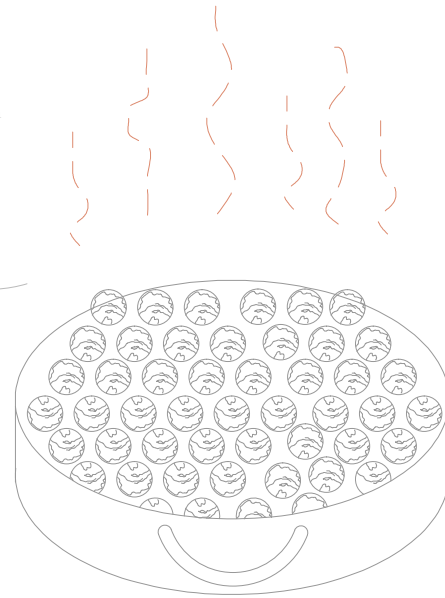

- STEP 1 -

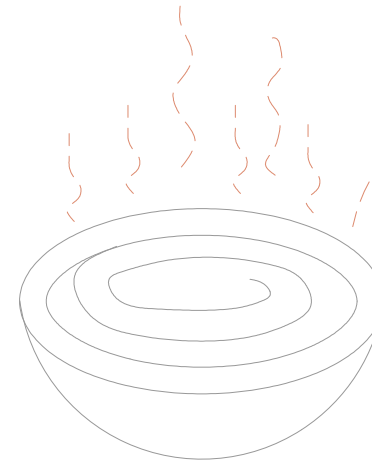

- STEP 3 -

Macadamia nuts are roasted with sugar to crystallise and crisp.

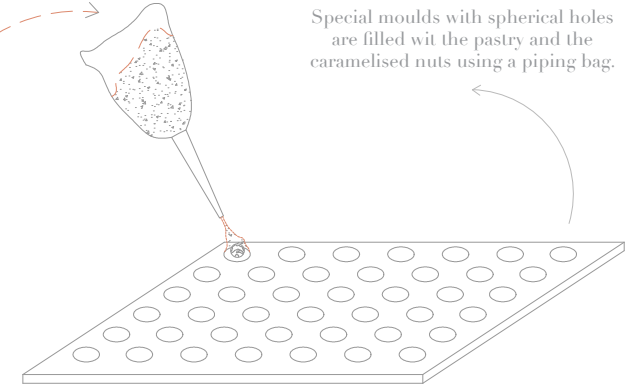

- STEP 4 -

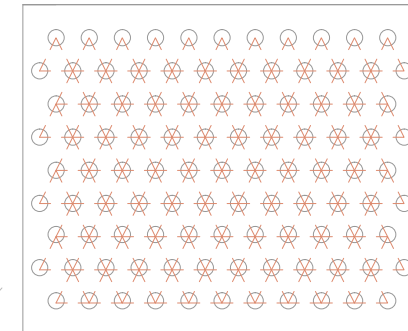

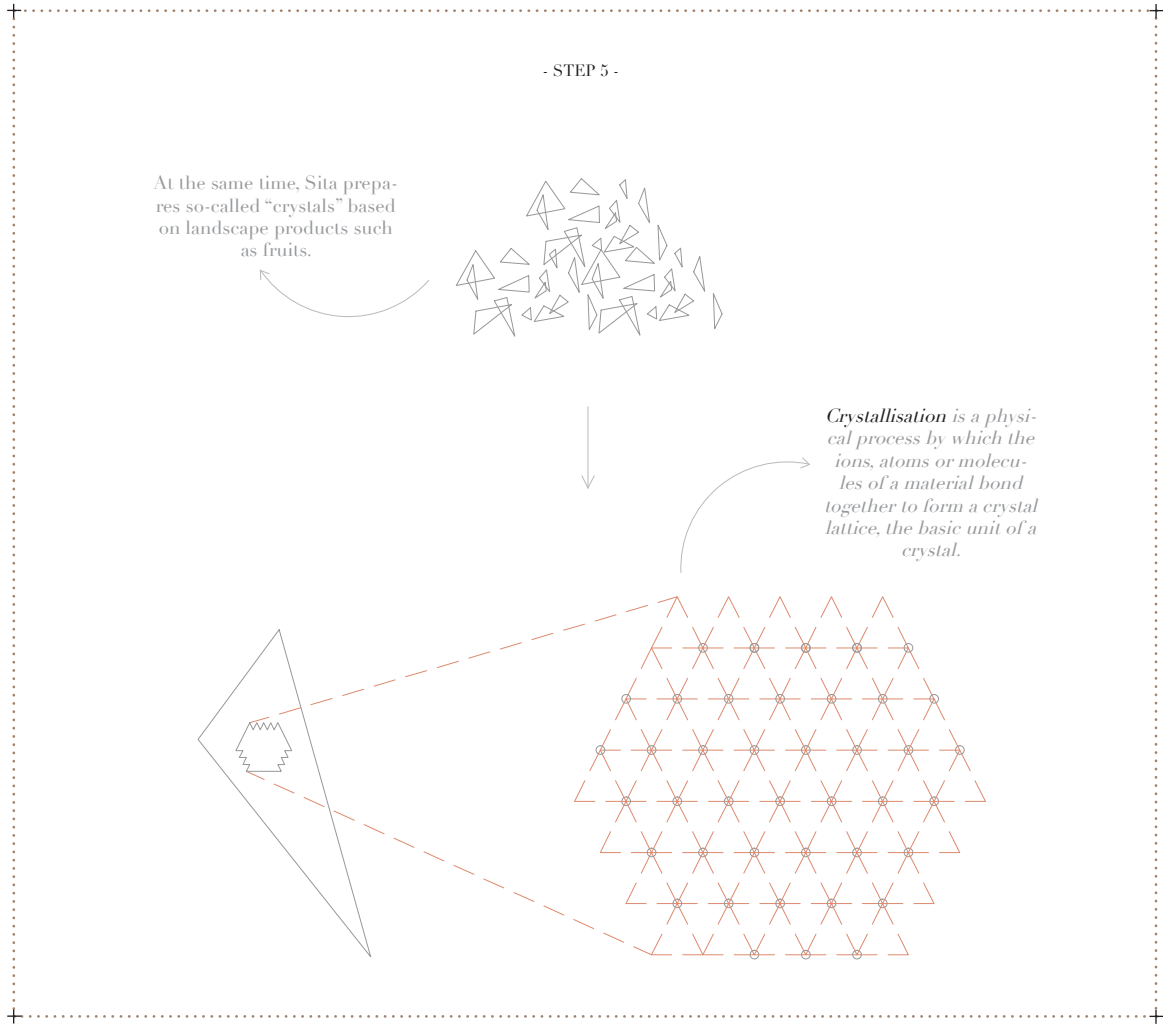

The chocolate cream is poured into a piping bag.

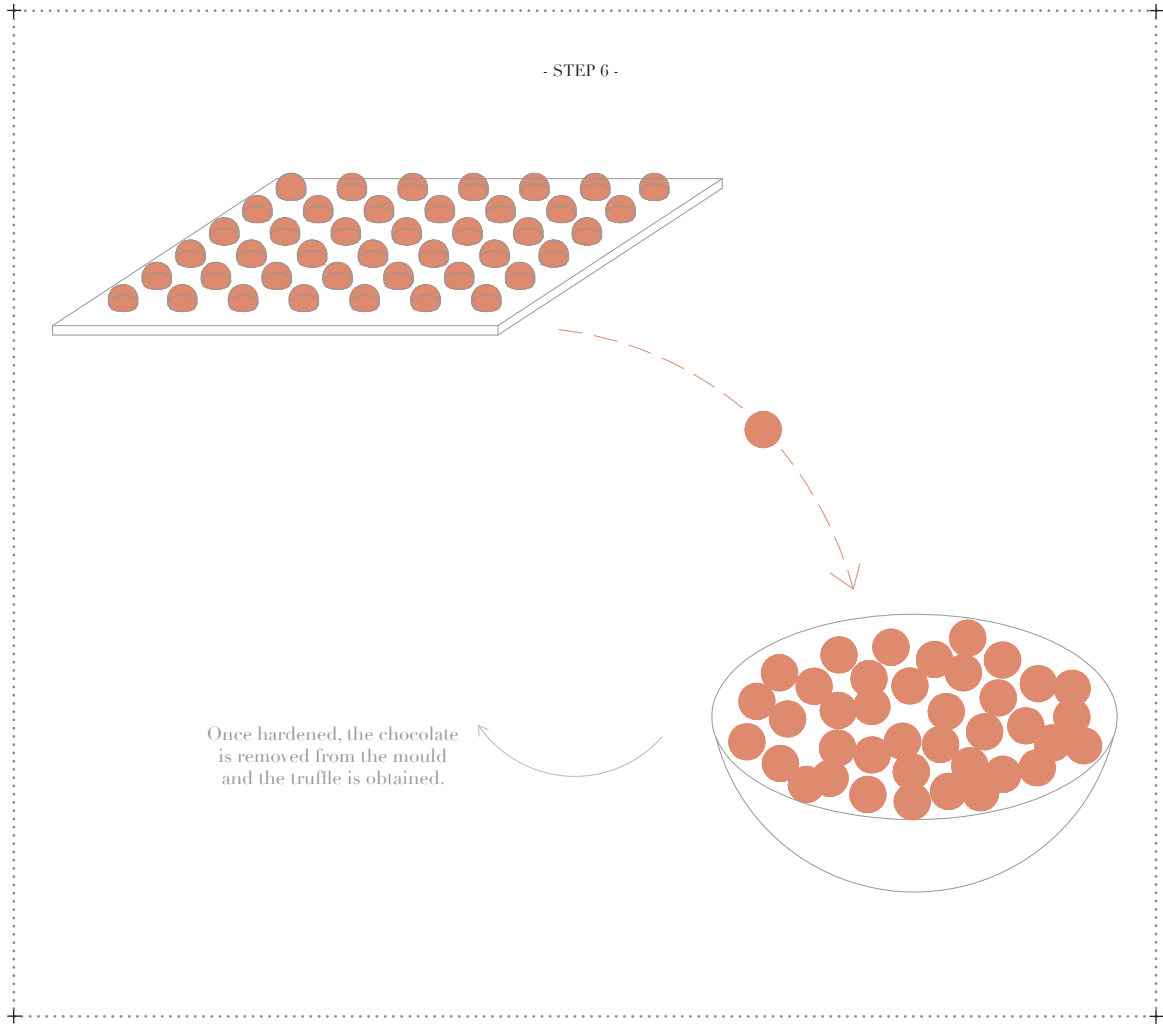

Once the mould is filled, it is placed in the refrigerator for hours to allow the chocolate to crystallise and harden.

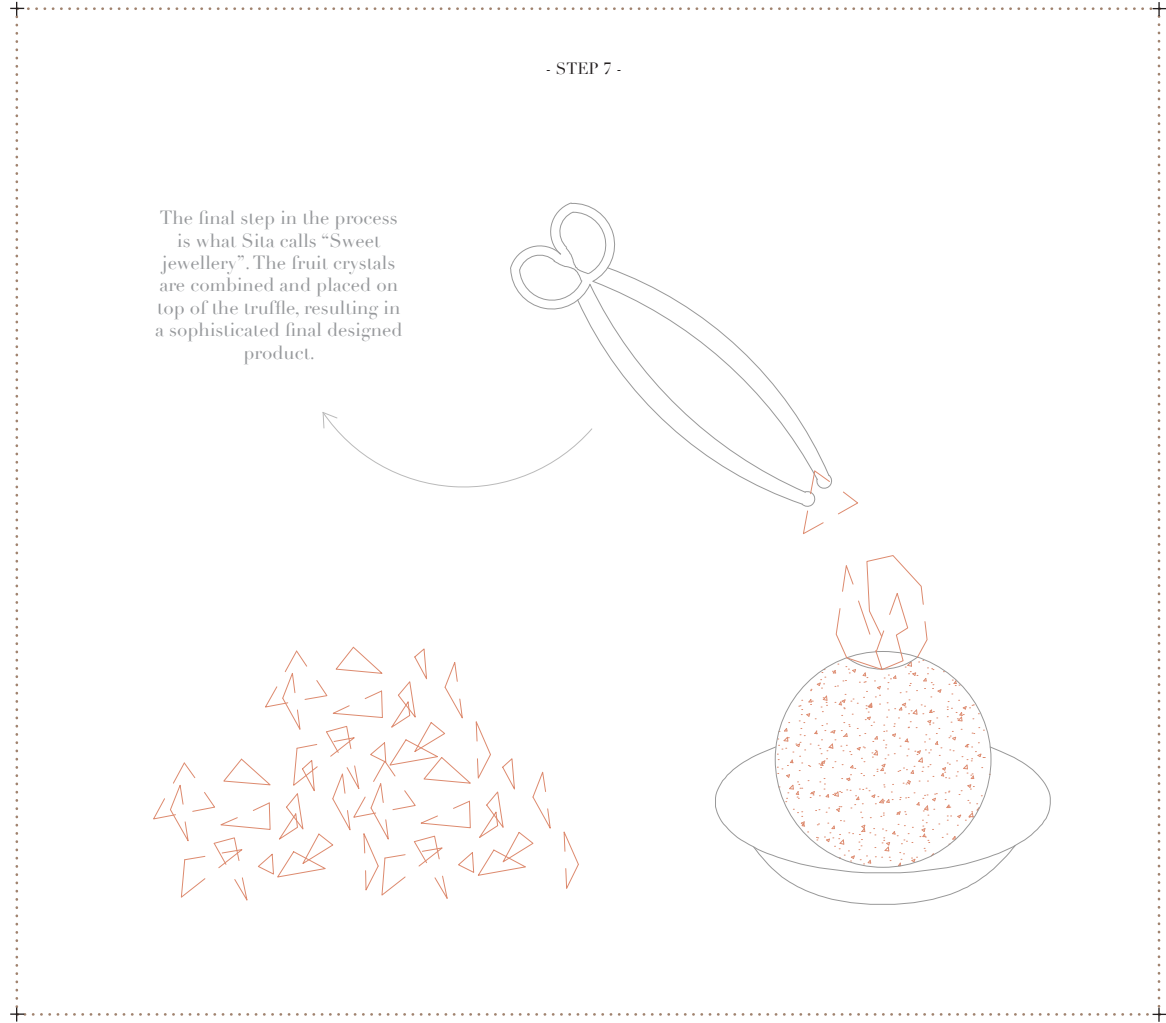

Special moulds with spherical holes are filled with the pastry and the caramelised nuts using a piping bag.

The Project
INTO THE CONCEPT

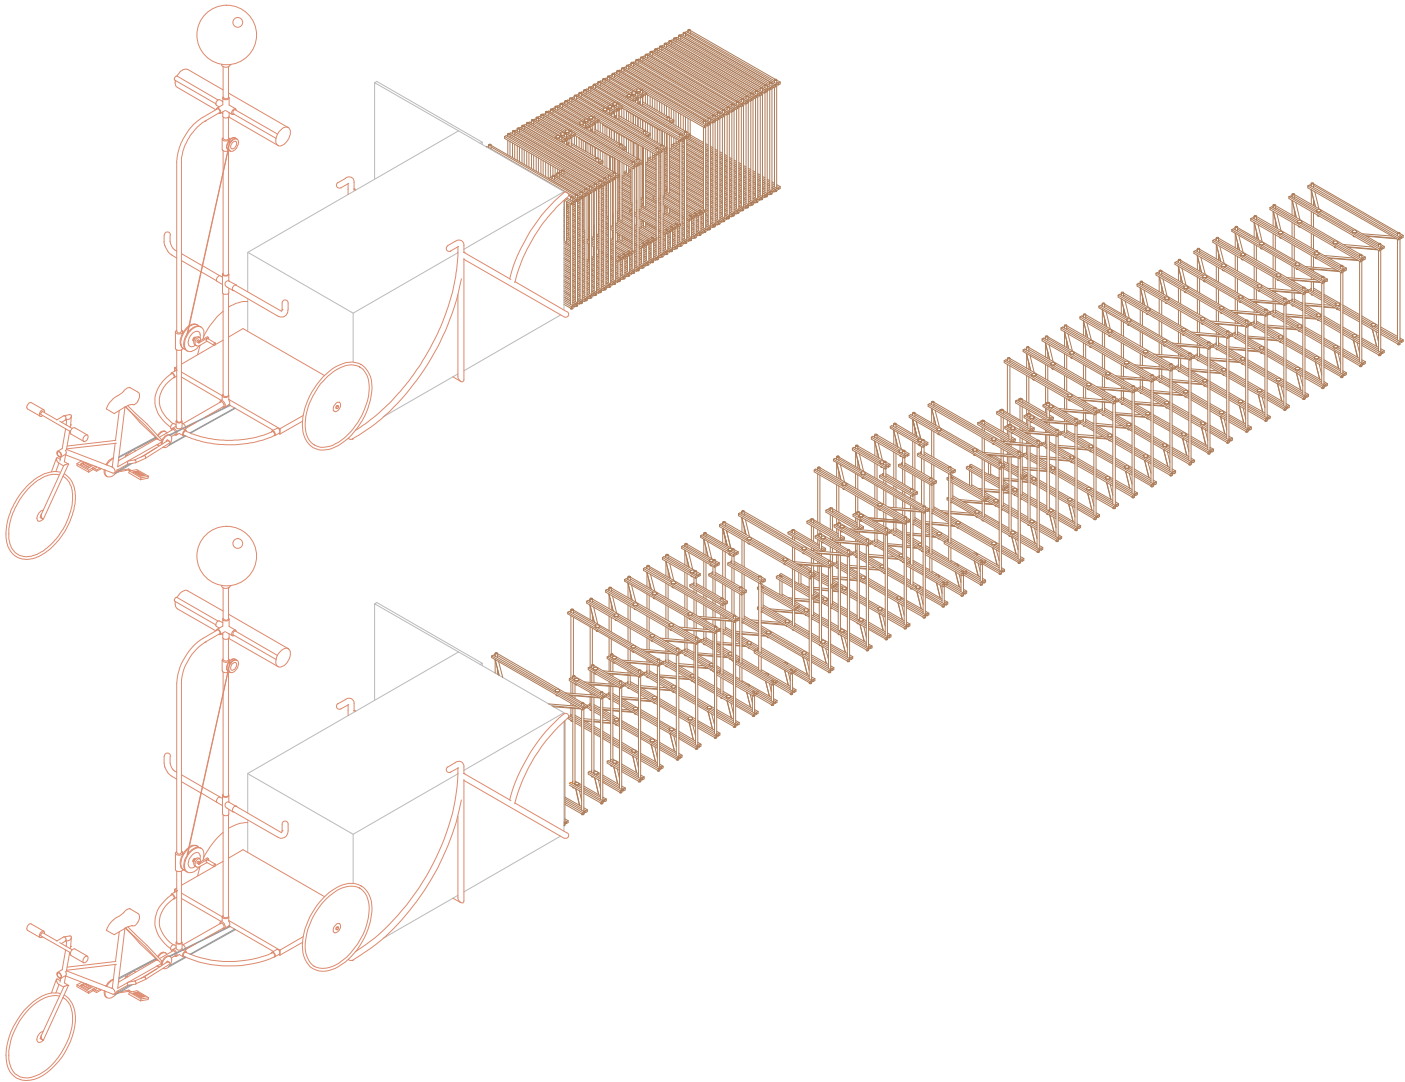

“ I want to enhance the image of my brand through a nomadic space that travels around different events creating < happenings > where the truffle can be revalued and sold as a gourmet product. I want people to connect with the landscape and their senses through cocoa”
